GIMP for Mac OS X

Since the 2.8.2 version GIMP runs on OSX natively. No X11 environment is required.

Native builds

Currently we have two source of installers.

A GIMP 2.8 DMG installer by Clayton Walker, stock GIMP build without any add-ons. Just open the downloaded DMG and drag "GIMP.app" into your "Applications" folder.

➦ [Download gimp-2.8.2-dmg-2.dmg](#)

A build by [Simone Karin Lehmann](#), with some extra plug-ins.

➦ [Download GIMP 2.8](#)

Macports

Disclaimer: we have not investigated if it's possible to build GIMP 2.8 from Macports

An easy way to compile and install GIMP and other great [Free software](#) on your Mac is by using [Macports](#). The installer allows you to choose from a large directory of packages. To install gimp using Macports, you simply do `sudo port install gimp` once you have Macports installed.

➦ [Download Macports.](#)

Fink

Disclaimer: we have not investigated if it is possible to build GIMP 2.8 from Fink

Fink is a package repository that offer mostly precompiled binaries. It provides the apt-get command known to e.g. Debian and Ubuntu users, and installing GIMP is as easy as `sudo apt-get install gimp` once you have installed the [Fink installer](#).

If there's no binary package, then `fink install gimp` will compile GIMP from source.

➔ [Download Fink](#).

[Show other downloads](#)

Source for version 2.8 (Stable)

GIMP releases available from gimp.org and its [mirrors](#) contain the source code and have to be compiled in order to be installed on your system.

For instructions, how to build GIMP from source code, please see [this page](#).

GIMP 2.8.4 is now available at <ftp://ftp.gimp.org/pub/gimp/v2.8/>. You may want to read the [Release Notes for GIMP 2.8](#).

To allow you to check the integrity of the tarballs, here are the MD5 sums of the latest releases:

File	MD5 sum
gimp-2.8.4.tar.bz2	392592e8755d046317878d226145900f
gimp-2.8.2.tar.bz2	b542138820ca3a41cbd63fc331907955
gimp-2.8.0.tar.bz2	28997d14055f15db063eb92e1c8a7ebb

GIMP help files are available at <ftp://ftp.gimp.org/pub/gimp/help/>.

Please consider using one of the mirrors listed below.

Development snapshots

GIMP 2.9.0 is a snapshot of current development towards GIMP 2.10. The source code is available from <ftp://ftp.gimp.org/pub/gimp/v2.9/>. Please make sure you read the [Release Notes for GIMP 2.9](#).

Sorry, there are no releases of the 2.9 development version yet.

A detailed list of changes in the development branch is available in [git](#).
