Your Macs are full of sensitive information

Intego Identity Scrubber

Your work computers contain sensitive data including credit card numbers, social security numbers, internal codes, employee records and more. If that information fell into the wrong hands, it could be a serious threat to your business. Intego Identity Scrubber can pinpoint exactly where the data is on your Mac and then encrypt or delete it so your business is thoroughly protected.

Protects, hides

Once you've found sensitive data it can be hidden from you. Intego Identity Scrubber can run a search for the following information that you want to keep safe deposit box.

Uncovers a variety of sensitive information

Hackers can use a multitude of information to violate your privacy and threaten your business. Intego Identity Scrubber can run a search for the following information that you want to keep

protected: Social security numbers, credit card numbers, health data, bank accounts, passwords and PINs, dates of birth, phone numbers, driver licenses, personal addresses and passport numbers.

Run custom data searches

Search for product names, client information, case numbers, secret project files, and other custom information that your business needs to protect. Just use Intego Identity Scrubber to set up custom searches so you can find specific keywords and scrub the results clean.
