

# Free estimating software for the construction industry

## Estimator

With this free program you can create estimations for constructions, print an estimation and a proposal.

Main goal of this program is to make quickly estimations of contracts with little as possible time and effort. If you miss a file import type, send us an e-mail.

Characteristics of the application:

- default cost type & group library;
- project cost type & group library;
- copying of substantiations from a different estimation;
- copying of contract specifications from a different estimation;
- export to and import from estimations and cost type libraries from excel;
- print an estimation;
- print a proposal;
- it is portable;
- it is free.

### Installation

Unzip the file. Place it anywhere you want. It stays there. Start Estimator\_x.xx.exe. If you do not have the correct java version, it opens the browser. So you can download it. If you double click it, first appears a warning dialog box. After agreeing, the program starts. Immediately there will be created a folder, with all the database files. The file and the folder must always remain together.

Download: [Estimator 1.83](http://www.estimatorapplication.com/) 15.198 MB

### Change log

- 1.83 10 februari 2013: Switch between different screens bug fixed.
- 1.82 07 februari 2013: Excel import bug fixed for decimal notation.
- 1.81 23 januari 2013: Print bug default proposal screen fixed.
- 1.80 14 Januari 2013: Scrollbar help & default proposal screen fixate. Default proposal screen file save with html extension.
- 1.79 09 Januari 2013: Rsx import unescape description added.
- 1.78 07 Januari 2013: Rsx import improved. PgUp en PgDn in the help screen work now.

**Updates**

Make first a copy of the DB folder and the old exe file. Place the new exe file in the same folder as where the DB folder is. Double click the new exe file and check if everything is okay. Yes? Then your update succeeded.

**Tutorial**

Have a look at the [tutorial](#).

**Improvement**

Anyone who has ideas for improvement, is being invited to send those to [estimatorteam@gmail.com](mailto:estimatorteam@gmail.com).

**Operating system**

This application works on all Windows platforms. If you work on an unix, a linux like or mac system, you can send us an e-mail and we will send you a jar file.

**Support**

If you have any questions or get stuck. Then you can mail to [estimatorteam@gmail.com](mailto:estimatorteam@gmail.com). Within 24 hours you will have a mail from us.

**License**

This application is freeware. You can download the license agreement [here](#).
