Citavi supports the entire research process —
from searching for sources to finishing your paper

Citavi Pro

Reference management and knowledge organization.

Your top choice for individual projects.

Citavi Team

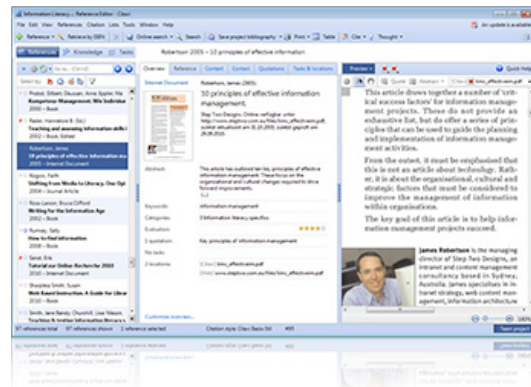

Ideal for collaborating with others on a local network — securely and simultaneously. You can also work on individual projects.

Citavi Reader

Lets you read projects but not make changes to them.

Citavi Free

For small projects up to 100 references. Full-featured — for teams as well. [Free of charge and never expires.](#)

” *Summing Up: Highly recommended.* — C. D. Vidas,
University of South Carolina Upstate, in CHOICE: Current
Reviews for Academic Libraries, June 2012

Citavi Does It All

Search the World

Search over 4000 library catalogs and databases from all major information providers. When searching the Web, the exclusive Picker extensions for Internet Explorer and Firefox let you effortlessly grab references, quotations, and images, making it quick and easy to expand your knowledge base.

Full Text Management

Citavi lets you add PDF articles as references, looks up their bibliographic information, searches for full text online, and creates screenshots of Web pages in PDF format, if desired.

Evaluating Your Sources

With Citavi, you can save summaries, direct and indirect quotations, images, comments, ratings, and any thoughts that come up along the way.

Organize Knowledge

Keywords let you describe references, quotations, and thoughts, while Citavi's hierarchical categories allow you to structure and group them. The flexible category system makes it easy to systematically structure research proposals and publications and is especially useful for outlining a term project, thesis, or dissertation as well as a more extensive research project.

Plan Tasks

Citavi's integrated Task Planner helps you keep track of the everyday tasks in academic research, including obtaining materials, evaluating texts, and returning library books. It also reminds you of deadlines, helps you manage project goals, and lets you delegate tasks — in a team, too.

Work in a Team

Citavi Team allows multiple people to work on shared projects at the same time on a local network, securely and simultaneously. Author and reader roles can be individually assigned for each project.

Write Papers

Citavi automatically generates a finished paper, inserting properly-formatted citations and a bibliography — in over 1700 citation styles.

” I tried many reference management programs and I must say that no one gets near to Citavi for completeness, ease of use and efficiency. Moreover, the integrated "knowledge organization" and "task planner" are truly killer features! — Prof. Stefano Adamo
