Live Interior 3D — Home and Interior Design Software for Mac

Live Interior 3D is a powerful and intuitive home and interior design application that lets you build the house or office of your dreams right on your Mac. Whether you are redesigning your home and making important decisions about materials and furniture or a professional designer looking to prepare a presentation for clients, Live Interior 3D has all you need.

The [Standard Edition](#) of Live Interior 3D is a great choice for those wanting to experiment with the interior of their home in 3D. Easily build an apartment or house with a roof. Drag and drop objects, change materials, create floor plans, and work in the 3D mode in real time.

Those who are looking to create intricate interiors may find that the [Pro Edition](#) best suits them. In addition to all of the features included in the Standard Edition, Live Interior 3D Pro packs a light source editor, wall designer, support for an unlimited number of stories, and much more.

Learn more about the [differences](#) between Standard and Pro.
