[Be the first to rate this product!](#)

BackTrack 5 brings Mac users a new level of safety by logging screenshots (entire window or just the topmost window) as well as all text (except passwords) that is typed for all applications. The log includes the application name, window name, date & time, and how long the window was the front window. For example, suppose you're working on a MS Word document, you haven't saved the document for awhile, and Word crashes.

Normally you would have lost all the text you typed since your last save, however, since the text is also in the BackTrack file, the text you typed has been saved. Simply copy the text from BackTrack to the clipboard, and paste it onto your Word document.

What's new in this version: Version 5.4:

- Fixed some UI issues, especially for Mac OS X 10.7 Lion.
- Fixed some memory leaks.
- Additional toolbar items added, making it easier to export the data.
- Added ability to view database file remotely using Dropbox.
