Control users with Elite Keylogger for Mac!

Free Elite Keylogger for Mac OS X easily records everything a Mac user types on the monitored computer. Easily capture what they are emailing about, discussing on chats, entering into web-forms, etc.

Clipboard monitoring is extremely important, most of passwords and other critical data is not typed but just copied and pasted. Elite Keylogger for Mac captures all texts copied to clipboard.

Elite Keylogger provides complete visual log of what was happening on your Mac by taking desktop screenshots at configurable timeout.

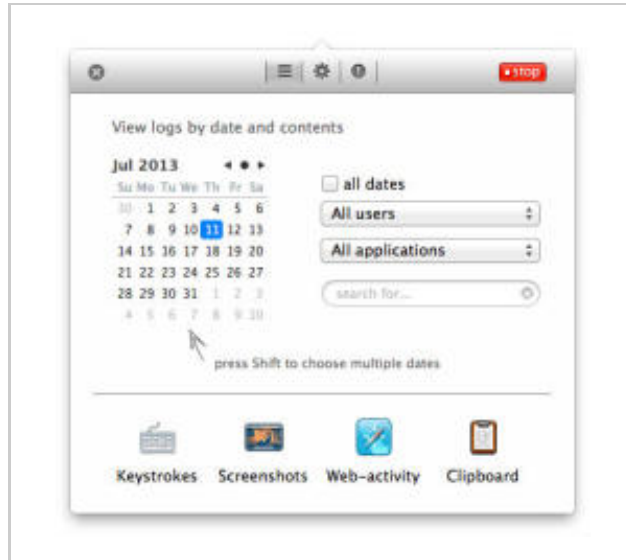

Elite Keylogger for Mac silently delivers recorded logs to your email address remotely.

Invisible Mac Keylogger: Elite Keylogger PRO for Mac. Log all entered passwords and user names and identify applications where the user logged on: browsers, Facebook, Mail, games, etc.

Elite Keylogger deserved exceptional reputation for being the only true low-core keylogger. For years it has been trusted as the only truly invisible keylogger: no traces anywhere! Elite Keylogger for Mac is free. The free edition includes all features but is not invisible and does not track passwords. Upgrade to Elite Keylogger PRO for Mac to unlock these premium features.

"Best Keylogger Software for Mac OS X"

August 16, 2013 | By [pauldaviss](#)

Version: Elite Keylogger 1.1.015

Pros

Monitor, record, and report every action performed on my Mac computer

Cons

If you forget the access password which you have set during the installation, there is no way to access the program!

Summary

I was very impressed by this program. I expected that this level of sophistication would come at a very expensive price, but the program is actually Free.
