Quick Specs

- Version:
4.1 build 023
- File size:
2.16MB
- Date added:
April 28, 2009
- Price:
Free to try (7-day trial);
\$39.00 to buy
- Operating system:

Windows
95/NT/98/Me/2000/XP
- Total downloads:
46,179

This PC-monitoring software stands out in a few respects in spite of its narrow scope. The appealing, tabbed interface makes configuring the program and viewing reports a painless process. In terms of versatility, Handy Keylogger offers fewer features than its competitors. It records keystrokes and open windows, captures screenshots, and tracks the clipboard but only works with Internet Explorer and can't block program use or objectionable Web sites. However, the program somewhat compensates for its limited feature set by giving you well-organized, easy-to-read reports that can be sent via e-mail. You can automatically clear old logs to reduce disk clutter. We didn't manage to find the program via the Task Manager, but it's nice that you can protect it with a password for additional security. Handy Keylogger is best suited to home users and parents who want to monitor their children's computer use.

Publisher's Description

From [WideStep Security Software](#):

Want to know what your children or spouse are doing on your PC? Get a keylogger and be informed. Handy Keylogger 4 is a new version of award-winning keylogger which gives you full control over your PC, and is totally undetectable to other users. With Handy Keylogger it is possible to start stealth monitoring in several clicks after your free download is complete. Handy keylogger mainly features and does a very good job with four types of logs: key strokes log, clipboard log, screenshots and websites visited. Version 4.1 build 023 may include unspecified updates, enhancements, or bug fixes.

What's new in this version: Version 4.1 build 023 may include unspecified updates, enhancements, or bug fixes.

"Handy alright... for trojans"

August 2, 2012 | By [Isaboe](#)

Version: Handy Keylogger 4.1 build 023

Pros

Installed fast, asked me very politely to turn off my antivirus

Cons

Hmm.. where to start... well, it had a very nice trojan in it. When I installed it my antivirus

software (Avast!) informed me that it had a large amount of malware in it. So DON'T USE THIS THING.

Summary

Corrupted program, mostly spyware.
