## Boost helps you gain back control of your PC.

Improve performance and stability with one click.

**Download Boost**

For Windows XP/Vista/7 and 8

Is your PC like this?

Give your PC a Boost

Enjoy a fast and clean PC

"This is a must have app for Windows!" Jay H. - Miami

### Make your computer run like new

There is nothing better than the feeling of a brand new PC. However, over time your PC quickly becomes sluggish, bogged down with tons of programs and clutter. With Boost, one click is all it takes to make your PC feel like new again.

### Quickly increase the speed of your PC

When all else fails... reboot right??? Isn't that what we do when our PC slows down? Rebooting sometimes works, but it's a huge inconvenience. Next time, instead of rebooting, just give your PC a quick Boost and get it back on the fast track.

### Prevent errors, freezes and crashes

When a program or Windows crashes, Boost can quickly analyze, troubleshoot and find a solution to prevent future crashes by identifying and correcting the cause of problems.

### Remove crapware and bloatware

The leading cause of PC frustration is the sheer amount of unnecessary programs our PC is running at any given time. Which ones should you remove and why becomes the question. Boost takes out the guess work by quickly removing annoying crapware.

Boost has received an **average rating of 5 out of 5 stars** based on over 100 qualified reviews by independent experts.

"As an former MIS Director of a major law firm corp. and experienced software user I recommend this software. It really does BOOST your PC, lap top or Tablet to make it run smoothly without having to worry that you have used up all of your physical memory or maximize your CPU usage." Wayne Y. - UC Berkeley

"There are numerous utilities designed to whip your computer back into tip-top condition some are scams, and some are decent, Boost is one of the better ones. Boost did a solid job of boosting the performance of my worn PC." Download.com

"I'm a very satisfied and recommend this. I use it every boot up and periodically during my sessions as performance degrades. I'm very satisfied with it. Bottom line is I'm a very satisfied customer and recommend this to anyone with a sluggish PC." Download.com

Convinced? Give it a try!
