Gamepedia is a powerful cataloging application for video and computer games which allows you to retrieve all your game information from the Internet by using keywords or an iSight or a scanner for the search. Search international sites for information about your video and board games and add links to reviews, walk-throughs and screenshots from any other site. You can keep a wish list for those games you don't own yet and a borrowed list for those you want back. To get even more organized, create smart collections that update themselves automatically whenever a new entry is added to the program. Display your collections in a table view, browse only the covers with the cover view or use the info view for a more personalized look.
