powerful utility plug-in provides a bidirectional data exchange between FileMaker dobe Acrobat. Whether you need to search text contained within PDF document ract data from PDF form fields, this is the plug-in for you. Using the PDF ulator you can create a searchable document management system or process faster by eliminating the need to hand key the information into your database.

FEATURES:

Document Management:
plug-in allows you to extract the text content and metadata of a PDF document ly into your FileMaker solution. Once in your database you can search through ntent inside the document and even determine what page of the document the nt appears on!

Automation:
ing the plug-in you can insert or extract data between PDF form fields and aker, speeding up and reducing the effort required to do this manually! This is useful for industries and organizations that depend heavily on forms (government ies, IRS, real estate and mortgage brokers, etc.).

Plug-in
Information

Successful integration of FileMaker plug-ins requires the

line and delete multiple PDF documents into a single PDF from within FileMaker

creation of integration scripts within your FileMaker solution. A working knowledge of FileMaker Pro, especially in the areas of scripting and calculations is necessary. After review of our overview videos, sample scripts and documentation you find you need assistance please contact us or fill out a [Request For Quote](#).

Demo
Limitations

Please Note This fully functional demo file is useable for 30 days. However, the demo will expire 2 hours from opening your FileMaker application. To reset please close and reopen your FileMaker application.
