# avast! Free Antivirus for Mac

The world's most trusted antivirus is now available for Mac OS X

[DOWNLOAD FREE ANTIVIRUS FOR MAC](#)

## Same amazing antivirus engine

Our award-winning antivirus/anti-spyware engine has been modified to protect the ever-growing threat against Macs. The engine's innovative scanning capabilities protect against viruses, spyware, and other malicious agents targeting your Mac OS X.

## Shields your file system, emails, and web use

Our shields scan in real time for malware and viruses hiding in incoming and outgoing

emails, hijacked web pages, downloaded files, and java scripts. It protects all this while having little to no effect to your system's performance.

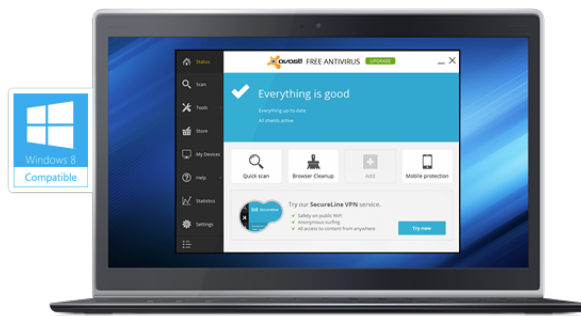

## A network of around 200 million 'sensors'

Our global community works together – anonymously – to provide fast samples of new viruses and malware via our CommunityIQ technology. This allows us to provide real-time virus-database updates to prevent the spread of infection.
