## Browse faster

Opera is a high-speed browser for computers. Pages and tabs load faster, even on slow Internet connections.

## Get peace of mind

Opera checks risky sites, alerting you to potential threats. Opera privacy settings also let you surf the web without being tracked.

## Organize your favorites

Put all your top websites right on your home page with Speed Dial in Opera. Add new favorites with one click.

## Make it your own

With hundreds of options, Opera extensions add useful services to the browser that give you more to discover on the web. Or choose from a variety of colorful themes to personalize the browser window.

## Take it with you

Store your bookmarks, Speed Dial sites and passwords using Opera Link, and you'll have instant access to all your favorite stuff on the go - wherever you may go.

## Create shortcuts

Customize your browsing experience in Opera, from keyboard shortcuts and mouse gestures to preferred ways of searching.
