

FortiClient

Endpoint Protection

FortiClient extends the power of FortiGate's Unified threat management to endpoints on your network. Desktops, laptops, tablets & smartphones, FortiClient enables every device - local or remote, stationary or mobile - to integrate with your FortiGate. With no per-seat license fees, FortiClient takes the headaches out of managing multiple endpoints so your users & guests can work efficiently anywhere, without compromising your security. It's the end-point solution for your FortiGate network.

New Feature Added in FortiClient v5.2

- + Pre-Install Malware Cleanup
- + Enable Full Protection with One Click
- + IPS based Application Firewall
- + On-net and Off-net Location based Behaviour
- + Client Customization & Rebranding
- + UI Support for Advanced VPN Configuration Options
- + IPv6 Support for VPN (IPSec & SSL)
- + Improved Single Sign-ON Agent Support
