Cloud System Booster also features a handful of extra features that help it stand out from the tuneup-utility pack. You can customize the app's look by changing its color, font type, font size, and adding a background photo. The Cloud Sync feature updates the Cloud System Booster database with your PC's information to help Anvisoft better fine tune its offering. There's also a very useful News Center that supplies users with tips on how to improve a PC's performance and delete hard-to-remove applications and toolbars.

I WAS HAVING PROBLEMS WITH A WEBSITE (Nym1.lb.adnxs.com) virus pop ups specially after I read that it's Trojans could steal my bank information and any personal information I had in my computer I decided to buy Cloud System Booster. OOOHHH thank GOD for this program because it got rid of this pop up that were harassing my computer every time I opened a website specially my online banking. You guys are GREAT and if I'm going to have peace of mine it's worth every dollar.

The new Cloud System Booster 3.0 is an updated version, it works very fast in cleaning and organizing files & your registry. I am using Smart Defender for almost a year as well with upgrades, their software works great! It also speeds up your Laptop within 60 seconds. I also like the blue colors against the black, but now the Cloud System booster has gone to orange colors. Not to bad.

AWARDS

CNET

"Anvi Smart Defender is a free anti-malware tool that offers multiple scan levels as well as cloud-based scanning and extras that clean and optimize your PC and repair issues caused by malware and garbage files..."

PC Magazine

" The product installs quickly and easily, and the necessary initial update doesn't take long. Anvi's slick user interface gets right to business, with three big buttons offering a quick, full or custom scan. "

Users' Review

Anvi Smart defender

★★★★★

" Thank you man for offering great alternative to other AVs. And i think your Anvi is much better as i scanned using other av, they failed to detect some malicious threats. But your Anvi did it. Thanks men."
