

SLIDEDOG FOR MAC (BETA)

Slidedog for Mac is currently in beta stage. Check it out and give us some feedback.

This is a Beta release

SlideDog for Mac is under development and may act unstable and in worst case make your computer crash.

Known limitations in the current version:

- No Prezi, KeyNote, Word or Excel support
- Live sharing not available yet
- Does not work well with OS X Spaces
- Does not work well with PPT slide timings turned on

Software Requirements

SlideDog is tested on Apple OSX 10.8 and 10.9 (Mavericks). SlideDog will use programs on your computer to show presentation files correctly. The list below shows the software currently supported by SlideDog.

- Java 1.6 or later
- PowerPoint for Mac 2011
- Safari 6 or later
