### Features of Comodo Cleaning Essentials

- Instantly identify and stop every untrusted process running on an endpoint with a single click
- Powerful antivirus scanner capable of removing malware, rootkits, hidden files and malicious registry keys hidden deep within a system
- Forensic level stats and graphs allow internal processes and resource usage to be analyzed with unrivaled granularity
- Integration with Comodo cloud scanners provides real-time safety verdicts for unknown processes
- Perfect for ensuring network endpoints are totally clean of threats
- Can be configured to replace Windows Task Manager in the Windows shell
- No installation required – can run direct from USB or user desktop via RDP

### Overview

### Features

### Frequent Questions

### Support

Comodo Cleaning Essentials (CCE) is a set of powerful security tools designed to help users identify and remove malware and unsafe processes from Windows computers. Designed as a portable application, the software requires no installation and can be run directly from removable media such as a USB key.

CCE consists of two core technologies:

- KillSwitch** - an advanced system monitoring tool that allows users to identify, monitor and stop potentially unsafe processes that are running on endpoint systems. Uniquely for a product of its type, KillSwitch leverages Comodo's huge whitelist database to isolate untrusted processes with an extremely high degree of accuracy – improving IT operational efficiency by reducing false positives and cutting the amount of time spent troubleshooting an endpoint machine.
- Malware scanner** – fully featured malware scanner capable of unearthing and removing viruses, rootkits, hidden files and malicious registry keys hidden deep within a system. The scanner is highly configurable, uses the latest heuristic techniques to detect previously unknown viruses, features first-class malware removal capabilities and is capable of detecting hidden drivers and services loaded during system start-up.

### System Requirements

#### Supported Operating Systems

- Windows 7 - 32 and 64 bit
- Windows Vista - 32 and 64 bit
- Windows XP - 32 and 64 bit

#### Minimum Hardware Requirements (32 bit or 64 bit version)

- Intel Pentium II 233 MHz or equivalent processor
- 128 MB RAM
- 210 MB free disk space
