

WinPatrol v32

The transition from BillP Studios to Ruiware has been great. I'm amazed and grateful to all the loyal WinPatrol who have welcomed me.

I'm confident our first release of WinPatrol will be a sign of good things to come

You still won't find obnoxious toolbars when you download WinPatrol and your PLUS features will continue at no extra cost.

Thanks,
Bret Lowry

Lose Your PLUS Code?

New computer or hard drive failed? Are you a PLUS member but can't find your code? Just Email your "name" to support@WinPatrol.com

Missing PLUS code sometimes due to Reg Cleaner or other programs. Lifetime PLUS membership still supported by Ruiware.

WinPatrol Reviews

WINPATROL v32 Protection for Pennies

WinPatrol works and plays well with others.

WinPatrol runs on Windows XP, Vista, Windows 7, Windows 8.x, & supports Windows 64 bit features without conflicts with other programs. The addition of WinPatrol provides a layered security approach required when even legitimate programs try to install unwanted toolbars. When you download from WinPatrol.com you receive a secure, certificate signed application.

By telling your friends and upgrading to PLUS you help provide a quality program without unwanted surprises.

WinPatrol PLUS is an investment where you can't lose!

- * One Time fee includes for ALL future WinPatrol versions.
- * No Hidden or Reoccurring Subscription Fees.
- * Keep a personal notes on files listed by WinPatrol
- * WinPatrol keeps track of the data & time files were first detected
- * Remove unwanted toolbars
- * Delay the startup time for quicker boot time
- * Share information on files with other WinPatrol users
- * Kill multiple tasks with a single click
- * Disable reoccurring autorun programs

A one-time upgrade to WinPatrol PLUS means you never have to pay again for premium features. Upgrading to PLUS helps continue the development of WinPatrol allowing us to tell toolbar company's where to stick it. If you can't speed up your computer using WinPatrol PLUS just ask and we'll give you a full refund.

WinPatrol was the first program to use a behavioral approach to detect new changes due to infiltrations and Zero-Day attacks. WinPatrol continues to add unique features and remains the **smallest, fastest system monitor** of its kind. Install WinPatrol anytime you rebuild or purchase a new computer. A snapshot of critical system locations and resources is recorded so if anything changes you'll know what changed and when!

What Does WinPatrol Do?

The popularity of WinPatrol is based on its ability to detect and prevent changes to important Windows settings. You'll be notified if unwanted programs are set to automatically run, if a toolbar has been added to Internet Explorer, if your home page, search provider or other internal configurations change. When a new Service or ActiveX component is detected it may be part of a legitimate program. WinPatrol will make sure and if it isn't, you can tell WinPatrol to disable it.

Just adding a program won't cause a notification but when a program is configured to run without your knowledge, WinPatrol will let you confirm the change is expected.

The techniques used to prevent changes were first developed by BillP Studios over 16 years ago. Feedback from supporters and researching new attacks has allowed WinPatrol to grow while continuing to run quietly in the background.

Some users may have experienced a name/password request using WinPatrol today. It was an error and has been fixed.
