SureThing Disc Labeler

Award Winning CD Label Design Software

SureThing is the original, and industry leading, software for designing CD/DVD labels, CD covers, and case inserts. In fact, SureThing has been the software of choice for a Who's/Who list of impressive CD labeling companies including Avery, Neato, Memorex, LightScribe, Roxio, and countless others. But only SureThing provides universal support for all brands of disc labels, direct-to-disc printers, and LightScribe devices. Do it your way, it's a SureThing!

It's Here! SureThing Disc Labeler v6

SureThing CD Labeler just got better!

New name, great new software. We're now **SureThing Disc Labeler** to represent the evolution from CDs to include CDs, DVDs, Blu-Rays, mini-discs and more. We do it all! But v6 is so much more than just a name. Faster, easier, new graphics and a lot of new content.

[Take a look at what's new](#), and we're sure you'll love what you see!

Latest Versions Guaranteed!

We want you to sleep at night, so SureThing Disc Labeler now comes with 12 months of Upgrade Protection. This means you get all major upgrades, minor updates and maintenance releases for a full year, all included with your purchase. Just another way SureThing has your back!

Dress to Impress!

Beautiful CD label and cover designs are at your fingertips! Easily coordinate your label and case insert designs, all within a single project. Create your own designs or let our SmartDesigns jump start your project. You can even select one of our professionally designed templates to find the right fit for your project. No matter how you slice it, impressive results are on the way!

Use Any Brand of Disc Labels

With most CD labelers, you are forced to use their exclusive brand of labels. Not with SureThing Deluxe! We have over 80 different cd label templates alone, including all the most popular brands. With our Template Creator, you can design your own. Of course, once you try [SureThing SuperVibrant Labels](#), you'll never want to change.

Direct-to-Disc Printing

Many inkjet printers support printing directly to CDs and DVDs. SureThing provides state-of-the-art support for direct-to-disc printing. Never fiddle with complicated driver settings again, let SureThing do the heavy lifting for you. Then, sit back and enjoy consistent full color discs with silk screen like quality.

World Class LightScribe Support

SureThing Disc Labeler was the first certified LightScribe disc labeler, and continues to be the leader in providing the most extensive LightScribe support available. True WYSIWYG support for colored LightScribe discs lets you see your designs on screen the same way they will look when printed. Our background print manager frees you to do other things while LightScribe burns your designs.

Thousands of Images

SureThing Disc Labeler Deluxe provides you with access to up to thousands of background and clipart images to give your designs the distinctive look perfect for your project.

Or drop in your own photos and logos to create even more personalized designs. Coupled with our new turbo-charged graphics engine, working with images has never been easier.

Target Printing

More than just design software, successful label printing means hitting the label directly on target every time. SureThing has the experience, expertise and technology to ensure the most accurate label printing possible. SureThing's precision is unmatched in the industry.
