All My Movies - Personal Movie Organizer

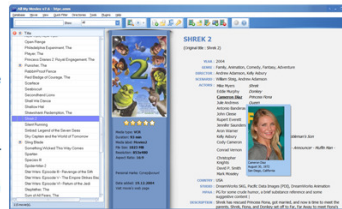

Create the catalog of your movie collection or track the movies you've watched with **All My Movies** program. It **doesn't require much time**, as you may think, because All My Movies will do almost anything for you. Automatically! Save your time, **DOWNLOAD** the movie organizer program now and create your first catalog in several minutes!

FREE DOWNLOAD

(installation file for Windows XP/Vista/7/8)

With All My Movies you can

- catalog your movies with almost **no typing**
- get movie and TV series details automatically from online database
- organize movie files on your internal/external hard drive(s)
- store extended cast details like actor's photo, biography, etc.
- know how many movies you have and detailed statistics for your collection
- keep track of the movies you've seen and write your own impressions of them
- become a movie expert :)

All My Movies main features are:

- Easily import film details from internet movie databases available in various languages. Additional internet video databases are supported with the [plugins for All My Movies](#)
- Ability to sync your collection with **iPhone, iPod Touch, iPad and Android** devices
- Extended cast details. Automatic lookup for **actor photos**, birthdays, filmography and biography.
- **TV Series** support. Auto filling episode title and descriptions.
- Browse your collection as a table (select the columns to display), cover thumbnails, virtual shelf, and coverflow view modes
- Ability to print collection using any existing report. Or you can create your own report with the built-in report editor.
- Ability to add DVD/Blu-ray using **UPC/EAN movie barcodes**. Just enter (or scan with a special scanner) barcode numbers and All My Movies™ downloads all the rest of the information automatically. Cheap CueCat barcode scanners are fully supported.
- Batch video file renaming using the templates
- Ability to scan the hard drive for the movie files. Add them all or only the new ones in a batch mode.
- Downloading large [cover images](#) and DVD/Blu-ray posters automatically from the databases like Amazon.com and DVDEmpire.com
- Multilevel automatic backup option - you will never lose your collection!
- Ability to play movies directly from the program. Can be used as a video playlist
- Clear overview of your **video inventory** with nice collection statistics
- Fast collection search using any of the database fields - title, director, year, cast of movie, genre, description, movie synopsis, etc.
- Export your video collection to PDF, HTML (several templates are available or you can create your own), plain text, CHM or Microsoft Excel format
- Password protection of your database file
- **Network mode**, so, you can share your database in your home network and access it from several computers simultaneously.
- Able to generate images with video details for several hardware media players like Tvix or Dune
- Capture frames directly from DVDs or AVI files and add them to the **movie database** to help you remember the movie.
- MediaInfo.DLL support for auto-filling technical details from the video files
- Import DVD/Blu-ray catalog from other formats (CSV text format, MS Excel files and AMC (Ant Movie Catalog) files). Easy migrating.
- Easy to use loan manager

Current special offers for All My Movies

- You have a chance to win an All My Movies license! Just guess the movie in our Movie Lottery!
- 25% discount offer for migrants from competitors' movie-collector software solutions only

User reviews

All My Movies - Brilliant

"I wonder how on Earth I could do without your GREAT program before! It's just brilliant! So many features, so many opportunities it gives to users! I own about a thousand movies - DVDs, Blu-rays - and it was a pain to organize them all. Your program has everything I've been dreaming about! And I love it!!!

Thanx a lot!!!!
