Ace Utilities - Optimize your PC with award winning collection of tools

Ace Utilities is an award winning collection of tools to optimize your PC's performance. It allows you to find and remove the junk files in your PC, invalid registry entries, delete your internet usage history, provides plug-in support to erase the usage-history for over 200 third-party applications, manage your internet cookies and much more. With a detailed startup-manager you can see what all programs, services, drivers, etc start automatically with Windows and optionally disable them. Furthermore, Ace Utilities also includes options to find true duplicate files, fix or remove broken shortcuts and to uninstall software completely. Other features include secure file deletion, disk space analysis, an empty-folder finder and more.

Supports: Windows 2000/XP/2003 Windows Vista/7 Windows 8/8.1

System TuneUp - Breathe A New Life Into Your PC

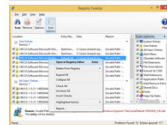

[Know More](#)

System TuneUp is a modified version of our product - "Ace Utilities". It has a different user-interface and will only work on systems using Windows XP or above.

Registry TuneUp - The Best Registry Cleaner You Will Ever Need

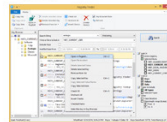

[Know More](#)

Registry TuneUp is one of the most advanced and effective registry cleaners you will ever need. It is a tool to optimize clean and tune up your system registry - the most important part of windows.

Registry Finder - Find your way through Windows Registry

[Know More](#)

Registry Finder provides a powerful search engine that allows you to find Registry information based on a search criterion. Registry Finder uses the Windows Registry editor tool (Regedit) so you don't need to learn how to edit, delete or rename registry keys.

Registry Compactor - Bring order to Windows Registry

[Know More](#)

The Windows Registry grows as data is added to it, but it never shrinks when data is removed. A bloated registry with a lot of empty space can slow down the boot time as well as performance. **Registry Defragmenter and Compactor** will rebuild and re-index your registry to eliminate structural mistakes and corruption.
