"We highly recommend this file synchronization tool for all user levels."

File Sync

GoodSync syncs files between your computer, mobile devices, FTP, SFTP, Amazon S3, Google Drive, SkyDrive, WebDAV, Azure.

Backup Files

GoodSync backs up files to portable drives, mobile devices and to FTP, S3, GDocs, SkyDrive, DAV or another computer.

Direct P2P Sync

GoodSync Connect syncs files directly between your computers, without slowness introduced by syncing via 3rd party servers.

Speed and Real-Time Sync

GoodSync is very fast and syncs files on your command, periodically, by a schedule or in real time (on file change).
