Let Gladinet bring the cloud closer to you

Create a Gladinet Drive to seamlessly access multiple cloud storage services using the familiar Windows® Explorer interface. Drag and drop folders or an entire drive to quickly transfer thousands of files. Access and manipulate cloud files with local applications. Automatically backup all the music, videos, pictures, or documents on your system to cloud storage. Create redundant backups to multiple providers.

Reduce storage costs and access unlimited storage by upgrading file servers to Cloud Gateways. Publish cloud storage as a virtual NAS with Cloud Gateway. And more...

Unleash the power of the Cloud
