Trusted and liked

Over 100 million people have avast protecting their computers, making

avast one of the world's leading - and most trusted - antivirus programs. They also like us, regularly placing avast at the top of user ranking charts over other antivirus products.

What people say

"Hi avast! team, after some internet research and reading good reviews of your antivirus software, I plumped for AVAST. Both my wife and I really like the simplicity of AVAST and feel reassured when the AVAST voice notifies us when the updates have been completed rather than having to go through a sequence of button pushing to clear the screen. I have also noticed that our computers are allowed to do what they do best, without the irritating interruptions or slow downs. KEEP UP THE GOOD WORK and grateful thanks for your free Home software."

C.W., United Kingdom

"Over the past few years, recommending avast! has been good for my reputation, but maybe bad for short-term repeat business! Sometimes people will get back to me a week or two after installing avast! and say something like; 'With all those 'providers', I thought it would use a lot my

computers resources, but it's running so smoothly I barely notice it'. avast! seems to be better coded and compiled compared to other, apparently smaller "footprint" programs."
