"I have found jesus. He came to me in the form of muCommander."

-- A happy user

muCommander is a lightweight, cross-platform file manager with a dual-pane interface. It runs on any operating system with Java support (Mac OS X, Windows, Linux, *BSD, Solaris...).

Here's a non-exhaustive list of what you'll find:

- ✓ Virtual filesystem with support for local volumes, **FTP**, **SFTP**, **SMB**, **NFS**, **HTTP**, **Amazon S3**, Hadoop **HDFS** and **Bonjour**
- ✓ Quickly copy, move, rename files, create directories, email files...
- ✓ Browse, create and uncompress **ZIP**, **RAR**, **7z**, **TAR**, **GZip**, **BZip2**, **ISO/NRG**, **AR/Deb** and **LST** archives
- ✓ **ZIP** files can be modified **on-the-fly**, without having to recompress the whole archive
- ✓ Universal bookmarks and credentials manager
- ✓ Multiple windows support
- ✓ Full keyboard access
- ✓ Highly configurable
- ✓ Available in **23 languages** : American & British English, French, German, Spanish, Czech, Simplified & Traditional Chinese, Polish, Hungarian, Russian, Slovenian, Romanian, Italian, Korean, Brazilian Portuguese, Dutch, Slovak, Japanese, Swedish, Danish, Ukrainian and Arabic.
- ✓ **Free Software** (GPL)

Current version is 0.8.5. Find out [what's new](#) in this version.

Nightly builds are also available, last baked on **Apr 7, 2010**. Check out the [recent changes](#). Please be aware that nightly builds may contain bugs that haven't been spotted yet.

Older versions are available for download by following the links on [this page](#).

muCommander is **Free Software**, released under the [GNU GPL v3](#). To download the source code, see the [developer resources](#) page.

**Mac OS X**

[v0.8.5](#) (dmg, 4.2 MB)
[Nightly build](#) (tar.gz, 3.9 MB)
for Mac OS X 10.4 and up.

**Windows**

[v0.8.5](#) (exe, 3.9 MB)
[Nightly build](#) (exe, 3.9 MB)
for Windows XP, Windows Vista and Windows 7.

**Debian / Ubuntu**

[v0.8.5](#) (deb, 3.7 MB)
[Nightly build](#) (deb, 3.7 MB)
[APT repository](#)
for Debian, Ubuntu, and other Debian-based OS.

**Webstart**

**Linux / Other**

**Portable version**

v0.8.5 (4.4 MB)

Nightly build (4.4 MB)

Launch muCommander right from your browser and get automatic updates.

v0.8.5 (tar.gz, 3.6 MB)

Nightly build (tar.gz, 3.7 MB)

for Linux, Solaris, *BSD, AIX, OS/2 and other OS with Java support.

v0.8.5 (tar.gz, 3.7 MB)

Nightly build (tar.gz, 3.7 MB)

Bring muCommander everywhere with you and use it on any computer.

- + **FreeBSD**: muCommander is also available as a [FreeBSD port](#).
- + **OpenVMS**: muCommander has been ported to [OpenVMS](#).

Requirements

Java 5 or later is required to run muCommander.
Java 6 is recommended, you can download it at java.com.

Mac OS X users: Your favorite OS already comes with a Java runtime so you're good to go!

Contribute

This is an ongoing project, and there are many ways you can help!
Here are some of the things you can do:

- ✓ [Report bugs](#), suggest new features or improvements.
- ✓ If you happen to speak a language that muCommander is not available in, you can [help translate](#) the interface
- ✓ If you're a [developer](#), you can help with the code
- ✓ If you're a graphic designer, you can contribute some artwork

In any case, head over to the [forums](#) to get in touch with the community!

Donate

If muCommander is useful to you, please consider making a donation, even a small one!
This application is free and intends to remain so, please support it if you can.
