### [Zimbra Open Source Edition](#)

It's free for individuals or organizations to use and has core ZCS email and collaboration server features but lacks support and enterprise-class power.

[Download ZCS Open Source Edition](#)

### [Zimbra Desktop](#)

A free desktop email client featuring the Zimbra experience plus offline capability. Works with Zimbra email, Yahoo! Mail, Gmail or any POP/IMAP account. Use it on Windows, Mac or Linux computers.

[Download Zimbra Desktop](#)

## About Zimbra

Zimbra is [open source server](#) software for [email and collaboration](#) - email, [group calendar](#), contacts, instant messaging, file storage and web document management. The Zimbra [email and calendar server](#) is available for Linux, Mac OS X and virtualization platforms. Zimbra syncs to [smartphones](#) ([iPhone](#), [BlackBerry](#)) and desktop clients like [Outlook](#) and [Thunderbird](#). Zimbra also features [archiving and discovery](#) for compliance. Zimbra can be deployed [on-premises](#) or as a [hosted email](#) solution.

Zimbra Desktop is a [free email and calendar client](#) which runs on any Windows, Apple or Linux desktop computer. It works online and offline and works with any POP or IMAP email account as well as [Yahoo! Mail](#).
