## Zimbra Desktop is free

Zimbra software is open source, meaning we make both the software code and the application itself available to anyone at no charge. Also, Zimbra Desktop is a full version; there are no missing features or catches. Enjoy!

**Try it with Zimbra Collaboration Suite**

## Take the Product Tour

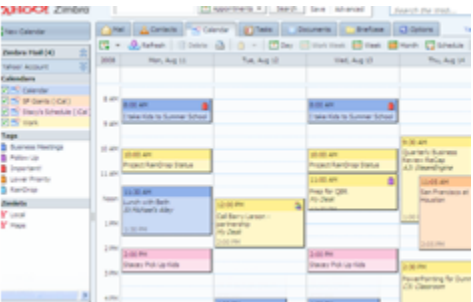

Unlimited email storage is great but searching through thousands of emails is a hassle. Our Conversation Views and Message Tags automatically highlight important emails in all your email accounts so you can find anything in a hurry. Advanced Search makes finding important pictures, documents or messages from people you care about a snap. [More.](#)

Zimbra Mail. Yahoo! Mail. Gmail. AOL. They all work automatically in Zimbra Desktop; even Outlook or any other work or personal email account using POP or IMAP is easy to set up. The best part—you can read them offline without an internet connection when you are in "airplane" mode. [More](#).

Nowhere else will you find an application with full email, contact, calendar, document management

and offline access features for free! (Take a look at this [comparison guide](#).)
