Welcome to Rightload!

Rightload is a small program that allows you to quickly upload files directly from a Windows folder to your server. Instead of using complicated software just to upload a few pictures, you just right-click on the files, select the server and target folder and Rightload will do the rest for you.

Here are the most important features of Rightload:

- Supports **Facebook**, **Flickr**, **Tinypic** and **Imageshack** as well as **FTP** and **HTTP** servers
- Automatic thumbnail creation
- Creates a list of uploaded files in BB-Code or HTML to paste into forums or websites
