

You're now downloading Skype

The Skype download should start within seconds. If it doesn't, you can [restart the download](#). You'll need Mac OS X 10.3 or higher to run Skype.

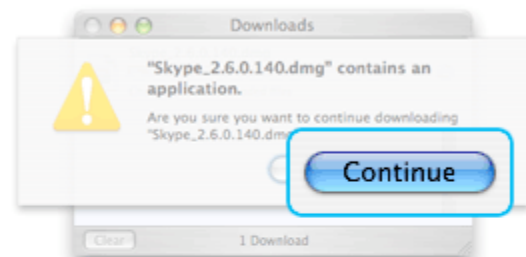

Quit Skype

If you have an earlier version of Skype running, you need to quit it.

Open the Download window

Open your web browser's **Downloads** window and double-click on the blue Skype icon. If a warning dialog opens, click **Continue**.

Drag the Skype icon to your Applications folder

If you have an older version of Skype installed, you'll be asked whether you'd like to replace it with the new one. Click **Replace**.

Open Skype from your Applications folder

After you've ejected the Skype disk image, you can run Skype.
