eM Client is designed to work on Windows XP, Windows Vista and Windows 7.

You need to have [.NET Framework](#) installed on your PC.

1

Save and launch "setup.msi" file.

- Click Download button to start downloading eM Client, if it hasn't already started. Launch setup.msi when it's finished downloading.

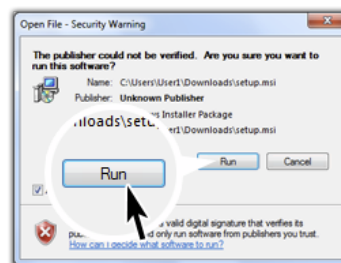

*Setup.msi file includes both **COMMERCIAL** and **NON-COMMERCIAL (FREE)** version. Every installation works for **14 days as an UNLIMITED TRIAL** after which you will choose which license you need.*

Download

2

Give permission to install eM Client.

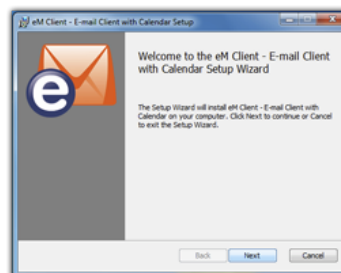

- Click "Continue" or "Run" when the security messages appear.

3

Go through the setup wizard.

- When finished installing, eM Client will start automatically.

4

Start using eM Client

- As a first step, you will need to set up an account connection - eM Client can do most of the work for you thanks to its Auto-discover functionality!
