Ubuntu or Debian users can simply run `apt-get install gimp` to get the latest stable release of GIMP.

#### openSUSE

SUSE users can install GIMP by running `yast -i gimp` or `zypper in gimp`, depending on the distribution version.

#### Fedora

Similarly to the above, Fedora users can install the latest stable GIMP by running `yum install gimp`.

#### Mandriva

Mandriva Linux users can install the latest stable GIMP by running `urpmi gimp`.
