This is the official GIMP web site. It contains information about downloading, installing, using, and enhancing it. This site also serves as a distribution point for the latest releases. We try to provide as much information about the GIMP community and related projects as possible. Hopefully you will find what you need here. Grab a properly chilled beverage and enjoy.

GIMP HELP RELEASED FOR GIMP 2.6

2009-10-09

The [GIMP documentation team](#) has been working hard and is proud to announce the availability of the first release of the user manual for GIMP 2.6.

The release is split into several files that provide pre-built HTML per language. Because of a major change in how the manual is translated, **most translations are work-in-progress and may contain untranslated strings**. You can find the releases on our FTP server: <ftp://ftp.gimp.org/pub/gimp/help/>. Users should wait until this release has been packaged for their platform.

Find more information about our goals and how you can help at <http://docs.gimp.org/>. The user manual project is looking for a **new project maintainer**. If you want to help, please join our mailing list or have a look at <http://docs.gimp.org/help.html>

GIMP 2.7.0 DEVELOPMENT RELEASE

2009-08-16

The release of GIMP 2.7.0 is a first step towards GIMP 2.8, the next stable release. Please note that this is an unstable development snapshot and read the [GIMP 2.7 release notes](#). A more complete list of changes can be found in the [NEWS](#) file. The source code can be downloaded from <ftp.gimp.org>.

GIMP 2.6.7 RELEASED

2009-08-14

GIMP 2.6.7 comes with lots of bug-fixes and it contains an important fix for using GIMP with the latest [GEGl](#) and [babl](#) releases. Please have a look at the [NEWS](#) file for a detailed list of changes.

The source can be downloaded from <ftp.gimp.org>. Binary packages for the various supported platforms should become available soon; please check the [Downloads](#) section.

GIMP ANIMATION PACKAGE 2.6.0 RELEASED 2009-06-05

GAP 2.6.0 is a stable release of the video menu intended for use with the GIMP 2.6.x series.

This release contains updates for video encoding/decoding, undo support for the storyboard feature and fixes for better compatibility with the GIMP 2.6.x releases. Please have a look at the NEWS file included in the [download](#) for a detailed list of changes.

GIMP 2.6.6 RELEASED

2009-03-17

GIMP 2.6.6 is a bug-fix release in the stable GIMP 2.6 series. This release contains an important fix for compiling GIMP against the recently released [GTK+ 2.16](#). Please have a look at the [NEWS](#) file for a list of other changes.

As usual, the source can be downloaded from <ftp.gimp.org>. Binary packages for the various supported platforms should become available soon; please check the [Downloads](#) section.
