

GIMP on OS X

[NEWS](#) [PHOTO EDITING](#) [DOWNLOAD](#) [SUPPORT](#) [DEVELOPERS](#)

Here you can download recent versions of GIMP for Mac OS X.

This includes support for PPC and Intel Macs as well as systems running Mac OS X 10.4.x (Tiger), 10.5.x (Leopard) and 10.6.x SnowLeopard.

Download

Just select the package according to your version of OS X. All packages are universal builds. They support PPC and Intel based Macs.

If you are unsure what to download, simply click on the  menu in the menubar and select „About this Mac...“. There you can see which version of OS X you're running on your Mac.
