Estimated Due Date: _____
(MM/DD/YYYY)

	Recommended Vaccine	Recommended Time for Vaccine	Projected Date of Vaccination	Vaccine Received?
TRIMESTER 1 – TRIMESTER 3	COVID-19 Vaccine	Weeks 0–40	Receive by: _____ (Date of Week 40)	Yes
	Flu Vaccine	Weeks 0–40 (ideally in Sept or Oct)	Receive by: _____ (Date of Week 40)	Yes
COVID AND FLU GUIDANCE: COVID-19 and flu vaccines are recommended at any point in pregnancy , although it is best to get the flu vaccine before the end of October. ^{1,2}				

TRIMESTER 3	Tdap Vaccine	Weeks 27 through 36	Receive between: _____ (Date of Week 27) & _____ (Date of Week 36 + 6 days)	Yes
	Maternal RSV Vaccine	Weeks 32 through 36 (if pregnant during RSV season)	Receive between: _____ (Date of Week 32) & _____ (Date of Week 36 + 6 days)	Yes
<p>MATERNAL RSV GUIDANCE: The maternal RSV vaccine (Pfizer’s Abrysvo) is given during pregnancy to help protect babies at birth during their first RSV season. In most of the continental US, maternal RSV vaccines will only be given September through January.⁴</p> <p>An RSV monoclonal antibody (nirsevimab or clesrovimab) can be administered to infants younger than 8 months of age from October through March if the mom did not get the maternal RSV vaccine.</p> <p>If you have already received a maternal RSV vaccine during any previous pregnancy, you should not get another dose of RSV vaccine when you are pregnant again. Instead, your baby should receive nirsevimab or clesrovimab.</p>
