

Re: Urgent Support for the Gateway Program

February 4, 2026

The President
The White House
1600 Pennsylvania Avenue NW
Washington, D.C. 20500

President Trump,

On behalf of the undersigned business and labor organizations, we write to express our strong support for the Gateway Program and to urge the federal government to lift the current pause on its most critical component- the Hudson Tunnel Project. The Hudson Tunnel Project is the most urgent infrastructure project in the nation; it is the foundation of economic growth, job creation, and long-term competitiveness for the entire Northeast Corridor, which contributes 30% of nationwide jobs and makes up 20% of U.S. GDP.

The existing North River Tunnels under the Hudson River are more than 115 years old and were severely damaged by Superstorm Sandy, yet they support more than 200,000 riders each day and are a critical link between New Jersey and New York City. A disruption or prolonged closure of even one tunnel would have devastating consequences for the regional and national economy. The Gateway Program is the only viable path forward to secure this vital piece of infrastructure and ensure that residents up and down the Northeast Corridor can rely on a safe, reliable, and resilient transportation network.

For the business community, Gateway represents billions of dollars in economic output and the foundation of daily commerce across the Northeast. For labor, it means tens of thousands of good-paying, union jobs, both in the near term through construction and in the long term through sustained regional growth. Pausing Gateway now, after years of bipartisan progress and investment, would jeopardize both the economic and human capital that depend on its timely completion. The work on this project so far has been an incredible success, and a new two-track crossing is already under construction, creating jobs and securing the region's future. Gateway is on time, and under budget. GDC CEO Tom Prendergast is a long-time transit veteran with a track record of success, who has demonstrated time after time that he has a unique ability to get large infrastructure projects completed successfully.

There are currently five active projects with 1,000 workers that would be out of work immediately, in the event of a pause in construction. In total, construction will generate 95,000 jobs and \$19.6 billion in economic activity over the life of the projects. A funding delay will

force these workers to demobilize which will only drive up the cost of the project and push back the schedule of this critical piece of infrastructure.

We urge the Administration to reaffirm its commitment to Gateway and resume full funding without delay. The costs of inaction, economic disruption, job loss, and long-term competitiveness put our region at risk. The business community and labor stand ready to partner with federal and state leaders to keep Gateway moving forward.

Thank you for your attention to this critical matter and for your continued support of infrastructure that keeps America's economy strong.
