Negro Physicians (Cores)

April 12, 1939

Dear Dr. Peterson: Thanks for your note of the 10th. Congratulations upon your marriage and my warmest good wishes to your wife.

I knew that you were at Harvard. Make no mistake about my appreciation for formal public health training. You will remember that you were expecting to do special work in tuberculosis when I talked with you. I expressed an opinion that it was not necessary to have public health training to do a good job in tuberculosis. I still feel that way.

It may be that if I attend the annual meeting of the National Tuberculosis Association to be held in Boston this coming spring that I shall have an opportunity to see you.

Very truly yours,

M. O. BOUSFIELD

M. O. Bousfield, M.D.
