SCHUYLER MEDLOCK CHRISTIAN

32

Professor physics and astronomy
Agnes Scott College

History of science in the south

Splendid scholarly record

His record has been in science = physics &
chemistry - He is now moving over to
history of science and this as a
project in that field = history
of science & the teaching of science
in the South -

Seems to me a rather barren
topic. As science it is not within
our ^{southern} ~~view~~ history of science &
me not basic

B
