REPORT: November 9th, 1935

During the time, more than a year, when Dr. Holder acted as Pathological-resident at Harlem Hospital, he gave the general impression as being one of great promise in the field of Pathology. He was careful, industrious, and had the proper scientific attitude.

Dr. Holder is possessed of a pleasing personality and is in my opinion, capable of making good use of the opportunity for further training in Pathology.

REPORT:

Have known Dr. Holder about five years. He came to Harlem Hospital as a volunteer worker in pathology without expectation of remuneration but solely for the purpose of study.

He is a good observer, records accurately and is honest in his deductions.

He is of good average ability by any standard; has an excellent personality.

As Director of the Medical Service I have had a good opportunity to check up on his work.

He is a hard worker, is conscientious, has the proper conception of his work and its scope. Got along splendidly with his associates both white and colored. Comment him to you. Thomas Martin
