Gentlemen:

I have known Dr. Lucilius C. Youngblood for a number of years, ever since his student days in Georgia State College where he made a good record for himself both as a student and a man. I have always regarded him as reliable, industrious and studious.

I am happy to know that he has applied for scholarship in medicine and I feel sure that you will make no mistake in granting him this scholarship. The Negro race is very short on good physicians and I am always glad when I find one who has quality of mind and character such as Dr. Youngblood, desirous of pursuing further study in this field.

Very truly yours,

R. R. WRIGHT, JR.,
President.
