

Candidate **J. Lorraine Jones** ✓ Special Field  
 Head of Science Department and Prof. of Biology Zoology (Morphology)  
 Southern University, Scotlandville, Louisiana

## Plan of Work

The application of vital staining to the study of the mechanics and identification of tissue in skin grafting and wound healing in the Amphibia, *Triturus viridescens viridescens*.

Wishes to work for one year beginning in Fall of 1938, at University of Leipzig, Germany, under Dr. W. Vogt, or at Harvard University under Dr. Rand.

Will return to present position.

## Digest of Application

Born February 19, 1904, Pittsburgh, Pennsylvania. Divorced.

University of Pittsburgh, B.S. 1927, M.S. 1932, Ph.D. 1934.

Teacher of Physics, Alabama State College, Montgomery, 1927-28, \$1320.  
 Head of Biology Department, Virginia Union, Richmond, 1928-31, \$2055. Head of Science Department, Tennessee A and I College, 1934-36, \$1960. Present position since 1936, \$1680.

Member of Sigma Xi. Has been doing individual study on skin grafting, wound healing, and photo-sensitization. Publications: "Integument and Integumental Glands of the Amphibian, *Triturus viridescens viridescens*," "Integumental Grafting and Regeneration in *Triturus viridescens*," "Vital Stains in Relation to Differential Sensitivity to Ligon in *Triturus viridescens*."

University of Pittsburgh graduate assistantship for one year, graduate council fellowship for one year, tuition in each case.
