With regard to what I can supply.

The amt I can supply is extremely variable since the only chance I have of making money is in the Summer. Even then chances of a job are always uncertain especially regarding the lucrative end of it. My expenses of living continue during the Summer since the people I live with in Cleve. are not relatives. On the average, that is during good seasons, I can save \$300 or better.

My fond hope, however, is to have the chance to do during the Summer months what I have always wanted to do — work in a hospital, technic laboratory or in some phase of medicine. During the Summer after my Junior year I am very anxious to do my obstetrical work. Obviously such pursuits afford little or no means toward tuition or expenses for the school year.

What is the total amount required for the proposed period of study? *\$1200.00.*

How much can you provide? *None.*

In addition to filling out the application blank, we are asking that you write an essay of not more than five hundred words, stating the major problem in your field, as you see it, and your reason for believing that additional training will enable you to help solve that problem, or, at least to make a contribution as a result of a wider experience. (Please use pages 5 and 6 for this essay.)

Child health, child hygiene and child welfare are now very clearly recognized as primary essential steps in the building of physically strong and intelligently active citizens in a community. These factors are equally important in maintaining the posterity of a race. Medically, we realize this even more forcefully when we recall, as Hess reminds us, that one-fourth of the civilized races of the world today dies within the first few years of life.

It is all very well to stress pre-natal care of the mothers and the prevention of death by childbirth. There is even a greater job after such a splendid ^{result} has been obtained. The newborn must be brought through to adult life. Such an era in the life of a child is equally as dangerous to it as was the period of gestation to the mother. The general practitioner of medicine even today does not seem to be fully aware of the importance of this particular phase of medicine called Pediatrics. Obstetrics is stressed highly in most medical schools but much less emphasis is made on the care of children. Among the Negro general practitioners Pediatrics is rather sadly neglected. And this, it seems to me, is a major problem for the race and for the community.

Among the Negro there are very many of the easily preventable diseases of children. Malnutrition, rickets, scurvy, contagious diseases and social diseases all fall to him in abundance. There is no denying the lack of intelli-

gence as an important reason why he and his children fall prey to these diseases. That is an obvious reason. There is, however, another reason less obvious but very important to the community in which he lives.

The Negro, despite his contact with other races over almost a century is still much less adapted to urban life and he has yet to build up an immunity to many diseases of civilization by prolonged contact. And so, his ignorance makes him unable to adequately help his progeny to overcome the nutritional disturbances of early life and the high susceptibility of both of them makes them prey to preventable diseases. He is thus the source, frequently, of epidemics in a community.

The field of Pediatrics, therefore, has a twofold purpose. To maintain the posterity of a race by developing strong healthy adults and to maintain the existence of a community through the prevention of epidemics by the practice of preventive medicine among the young.

It is an ideal to work toward.

Dear Sir:-

Re: Wm. W. Cardoza

I am writing in the interest of the above-named young man who is now in the medical school at Ohio State University, Columbus, Ohio. He finished the mechanics course at Hampton Institute, and I think he is now in his junior year in the medical school.

I wish to say that Mr. Cardoza is a hard working young man, and I think he has done well in getting as far along with his course as he has. I am sure the Hampton Institute faculty will appreciate any assistance you may give him in order that he may be able to complete his medical course. We feel that any money spent on him will not be misplaced, as in my opinion he will be very serviceable in whatever community he may choose for practice. I shall be glad to answer any further questions regarding him.

Appreciating any consideration you may give Mr. Cardoza, I am

Very truly yours,

Walter R. Brown

My dear Mr. Arthur:

I am writing on behalf of ~~William H. Scoville~~
who graduated from Hampton in 1924 and was salutatorian of his
class.

He improved steadily while at Hampton Institute
and left in this honored position. We prized his work here, and he
seems to have done excellently at the Ohio State University. The
fact that he was elected Vice-president of the Alpha Phi Alpha
Fraternity, an honor very few colored students ever receive, indicates
he is a leader amongst the undergraduates and must hold their respect.

I feel sure anything your Fund can do for this
man will be a real service in the unsupplied field for Negro doctors.

Very sincerely yours,

Arthur Howe

President.

Mr. Edwin Embree,
Julius Rosenwald Fund,
900 South Homan Avenue,
Chicago, Illinois.

Dear Mr. Embree:

I give you below an excerpt from a letter I received today from Simon Lazarus of Columbus, Ohio, which is self-explanatory.

"Did the Governor of North Carolina say to the Governor of South Carolina, "It's a long time between drinks"? I guess that can be applied here -- that it is a long time since I have either seen or heard from you, but I want to pass this one over to you, if it should be in your lap.

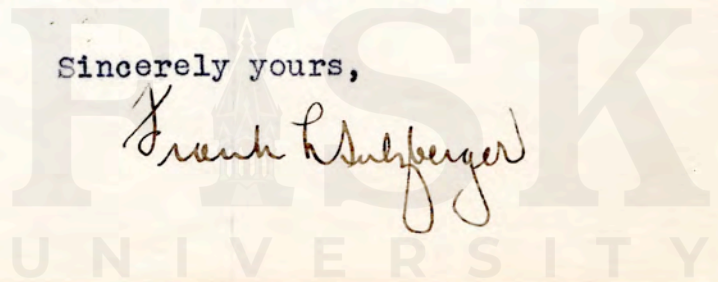

I am very much interested in a student at Ohio State University, named William W. Cardozo, who is in the medical school. This young man is a negro but one of the most interesting personalities I have seen in a long time, and he is doing the best he can to graduate. He has sent in his application for a scholarship in medicine to the Julius Rosenwald Fund and I am advised that six of these are awarded. Not knowing whether they are passed on by the Board of Trustees of the Fund or not, I am just taking the liberty of writing a testimonial letter in this young man's behalf.

I did not know that Cardozo was a negro on meeting him, but he made that point very plain on our first interview, and he seemed to me to have the stuff in him that warranted some financial help. Up to date, I am mighty happy to have been of some slight assistance to him. So if the distinguished member of the Board can see his way clear to pass a good word along, it will be very much appreciated."

Sincerely yours,

Frank L. Sulzberger

Dear sir;-

Mr Wm W. Cordoza, a Medical Student of Ohio State University,

-just finishing his Sophomore year has informed me that he has made application with your Foundation for a Medical Scholarship and has asked me to write a statement concerning my impressions as to his ability and worthiness for such an appointment.

I had Mr Cordoza in my classes in Bacteriology during the the first ~~two~~ quarter of the Current School Year and he is taking a Lecture course at the present time in Protozoology. His work in all these courses has been above the average of the classes.

He is entirely trust worthy and and I am sure merits favourable consideration. He is honest, industrious and desirous of doing his best in his work.

I hope that he may receive this consideration, and anything that me ~~given~~ for him will be appreciated.

Very truly

Director for Medical Services,
Julius Rosenwald Foundation,
900 South Homans Ave.,
Chicago, Ill.

My dear Sir:

This letter will recommend to you two of the Sophomore students in the College of Medicine of the Ohio State University, Mr. William W. Cardozo and Mr. Guy A. Ginn. These students are, as I understand, eligible for appointment to a fellowship in the Rosenwald Foundation, and I wish to give them my hearty recommendation.

As students in the Medical College they have made excellent records. Mr. Cardozo during his Freshman year secured a 2.2 point average. His Freshman work consisted of nine hours A grade, nine hours B, and eleven hours of C grade, A being the highest grade given in the University, B second high, and C third or the average grade. In the work in my department Mr. Cardozo in the work thus far has grades of 85, 72, 82, and 90. Mr. Cardozo is an industrious, intelligent, and conscientious student.

Mr. Ginn is also a very conscientious and industrious student whose grades are slightly below those of Mr. Cardozo. He received an average of 1.5 points on his Freshman work, consisting of three hours of A, fifteen hours of B, and eleven hours of C, and in the work in my department at the present time Mr. Ginn's grades are 83, 74, 70, and 90. The grades in my department will indicate a final grade of B with a possibility of A. The personality of these two students is excellent. They have been quiet, respectful, and attentive, and studious at all times. I am convinced that you will not be disappointed in these men if they receive your appointment.

Yours very sincerely,

Ernest Scott M.D.

Dear Sir:

I think you have by now received all the recommendations which I listed on the application to you for the Medical Scholarship for the year 1931-32. If you have not kindly let me know and I shall be glad to check up on the matter.

I have also put in a request to the registrar here for a transcript of my record to be sent you directly from her office. I hope you have received it. You will note that the first two years of my college work were taken at the University of Pittsburgh, Pittsburgh, Pa. and that the grades for that work are not listed but that "K" credit is given by the registrar. You are, therefore, unable to tell just what I did while at Pittsburgh except that I passed the work---indicated by the K credit. I should like to know whether you prefer that I have the grades forwarded to you? If you so wish I can write to the registrar at Pittsburgh and have them sent to you.

If there is any other information about myself which will be of service to you in your decisions please know that I await your requests.

Respectfully,

Wm. C. Cardozo.

May 13, 1931

My dear Mrs. Bentley:

Again I am probably surprising you with this unexpected letter from me. But it seems as if I am running in and out of your life quite often lately.

You perhaps remember our short talk last Christmas about the Rosenwald Scholarship which I mentioned to you. Just to refresh your mind:--the Rosenwald Foundation gives scholarships to medical students, among many others, each year. This year they plan to give away six (6) and I am applying for one. I told you I had that in mind last Christmas and that I would appreciate it if you would speak a good word to Mr. George Arthur and to Mr. Embree if you knew him. You told me you knew Mr. Arthur. He is not connected with the medical scholarships directly but I am sure that he will speak to the one who is in charge of the matter, were you to call his attention to it.

Perhaps it seems somewhat in bad taste to have someone speaking a good word in this instance and if it is Mr. Arthur's judgement then, of course, the best thing is to let it drop. The reason I am so anxious about it is because I know that there is another boy here trying for the same thing and I, frankly, want to be the favored one for just one reason--- I need it. He, this boy, has father and mother both working for the state and sending him thru school--at least they have so far, while I have no one to whom I can look except myself. Thus you see the Summer work is the only chance I can bring anything --if I get a job. I do not need to tell you of that problem during these hard times. Therefore, if I get the scholarship I can return to school--if I do not, well. I can only live in hopes.

You probably saw my picture in the Defender sometime ago in which it said I was making a tour of the chapters of the Fraternity. I was in Chicago but one day and was unable to get around and have a chat with you. However, you know I shall look you up when I do get there again. I hope that you are enjoying your usual good state of health. School for me is as I have said before giving me the thing I love most no matter how hard. I hope that you will have time to write me a short note and let me know about the matter I spoke about. Elizabeth sends her love.

Yours sincerely

Mr. Edwin R. Embree, President,
The Rosenwald Fund,
Chicago, Illinois.

Dear Mr. Embree:

It is a privilege to recommend Mr. William W. Cardozo for consideration by the Rosenwald Fund as a ~~candidate for a~~ Rosenwald Scholarship in Medicine. I count it a privilege because in the years of close observation and close acquaintanceship with all activities, especially as they affect Negroes, it has been my good fortune to know few students with the high qualities and distinctly high intelligence possessed by Mr. Cardozo.

I have known Mr. Cardozo for about ten years. He was a brilliant student during his career at Hampton Institute. Active in student affairs, versatile and capable in athletics, studious, industrious, honest, and determined, Mr. Cardozo justly earned second honors in his class at graduation time.

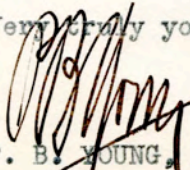

At Columbia, where he took special courses for a year, he continued his excellent work. Later at Pittsburgh he maintained his fine record of scholarship and exemplified those high qualities already mentioned. He completed his pre-medical work at Ohio State University, where he intended entering medicine, and there he further evidenced his ability.

As a medical student he ranks in the upper third of his class, and my son, now is a law-journalism student at Ohio State, tells me that he made several A's during the winter quarter.

That Mr. Cardozo's versatile abilities are recognized generally, is shown by his election as a national officer of his fraternity, which embraces graduate and undergraduate members at about 90 chapters.

Because he needs help, is worthy of help, and because I am confident that a scholarship awarded Mr. Cardozo will not be misplaced, I respectfully urge that his application for a Rosenwald Scholarship be granted most sympathetic consideration.

Very truly yours,

P. B. YOUNG, Editor

Dean of Medical School

The above-named candidate has applied to this foundation for a scholarship to enable him to secure further training in medicine and has given your name as a reference.

We should appreciate a frank statement of your opinion of this candidate's abilities and personal characteristics. In what way and when have you known the candidate and his work?

Your reply will be held in strictest confidence.

Edwin R. Embree
Associate for President

REPORT:

Dr. Cardozo made an excellent scholastic record while in medical school. He has a very good personality and is ambitious. He has served a one year internship at the Cleveland City Hospital and is now a resident in pediatrics in the Provident Hospital. He is very anxious to continue post-graduate work in medicine. Anything you can do to help him will be greatly appreciated. I am glad to recommend him to you for favorable consideration.

Confidential Report on Candidate for Scholarship

Name of Candidate Dr. William W. Cardozo, Provident Hospital, Chicago

Report Requested of Dr. Arthur Howe, Hampton Institute

The above-named candidate has applied to this foundation for a scholarship to enable him to secure further training in medicine and has given your name as a reference.

We should appreciate a frank statement of your opinion of this candidate's abilities and personal characteristics. In what way and when have you known the candidate and his work?

Your reply will be held in strictest confidence.

Edwin P. Embree
Associate for President

REPORT:

Although I do not know Dr. William W. Cardozo personally, I find from our records here he graduated in 1924 and was salutatorian of his class. His marks while here - Sept. 16, 1919 to July 26, 1924 - were as follows and indicate that he was a student above the average:

English	- C	U.S. History	- B
Literature	- C	General History	- C
Physics	- C	Economics	- C
Chemistry	- C	Public Speaking	- C
General Science	- C	Machine Work	- C
Commercial Law	- B	Trade Theory	- B
Business Procedure	- C	Shop Math	- B
Music	- C	Forging & Tempering	- B
Ancient History	- C		

(Passing Grade "D": Length of term - 36 weeks: Recitations - 50).

I have talked with several people who knew him during his days here and they report that he is an alert, able fellow, ambitious and one who will undoubtedly do well in his chosen field.

I attach comments from Major W.R. Brown, the Dean of Men, and Mr. C.H. Williams, Director of Physical Education, both of whom knew him as a student.

Dear Dr. Davis:

Enclosed is a copy of a letter from a Hampton graduate - Dr. W. Warrick Cardozo.

According to all I can learn from those who can remember him here, he was a good citizen and has done well since going to Ohio State and into the field of medicine.

Will you kindly advise me as to whether you think the Julius Rosenwald Fund could consider his request for scholarship aid. If so, I will gladly write to him further asking for more details as to costs. If it is a matter which the Board could not consider, I would appreciate having your advice as to what steps to take.

Very sincerely yours,

Arthur Howe

President.

CONFIDENTIAL

September 30, 1934

Dr. Albert Howe
Hampton Institute
Hampton, Virginia

Dear Sir:

Although I have not had the pleasure and the privilege of knowing you personally at Hampton I am writing you for some advice on a matter of vital importance to me.

As you may know, I am a Hampton Alumnus of 1924. I have been fortunate in being able to continue my education since leaving Hampton and have graduated from Ohio State University at Columbus, Ohio with the degrees of B.A. in 1929 and M.D. in 1933. Since leaving Ohio State University I have been a rotating interne for one year at Cleveland City Hospital in Cleveland, Ohio and am now resident in Pediatrics at Provident Hospital for one year ending next June 30th.

As you note, I am attempting to specialize in Pediatrics, a specialty very much neglected among Negro physicians. At the termination of my year here I am sure I shall not be completely equipped in this specialty, but the chances for me, a Negro, to continue my training at some other institution by appointment are practically nil. However, I believe that I might be accepted in one of the larger clinics in this country, certainly in those abroad, were I sent there on a fellowship. I am informed that the General Education Board grants such fellowships in special cases of this kind but situated as I am I cannot contact the members of the Board. I am, therefore, asking if you would contact some of the members of this Board, recommending me as you see fit and if you think it wise send me their names so that I might write them. In the latter instance, of course, I shall abide by your suggestions. In the event that you do not know intimately enough the members of this Board perhaps you do know some one interested in Hampton and its graduates and willing to grant a personal fellowship to be used for the purpose I mention.

Fortunately, I have been able to send myself through college and medical school on the results of Summer vacation work and a patrimony from my grandmother. Now, however, I have no source of income whatever and do have some small debts. Thus, to continue my studies under a fellowship I shall have to depend totally on this for support.

There are many things for which I am thankful to Hampton. Graduating from there as salutatorian in 1924 I think I said some rather "high sounding" things to my classmates. Now, however, I am rather proud to state that the soberness of purpose and the realization of my responsibilities to myself and to my Race which Hampton inculcated in me during my five years there have been extremely beneficial. Especially is this true with regard to the four years in the study of medicine, for with this soberness and steadiness of which I speak I was able to finish Number Seven (#7) in a class of ninety (90) and to be elected one of the charter members in the new chapter of Alpha Omega Alpha, National Honorary Scholastic Medical Fraternity established there in 1933. It will interest you to know that of a total membership of some three thousand (3000) there are but eight (8) Negroes. I think this ranking in my class enabled me to be the third Negro admitted as an interne at Cleveland City Hospital.

UNIVERSITY

To be other than a "Self styled" specialist today in America one must be recognized and listed as such by the national body of that particular speciality. To be so-listed one must have had a certain amount of training in that specialty alone and must have contributed to the literature. To date but one Negro has come up to the qualification of the American Board of Pediatrics. It is my hope to be the second Negro to qualify and be accepted before this Board. To do so would require for me at least one more year of study and preferably two. With financial help I would be very willing to put in this time although it would mean personal stringency.

As I have stated, I am at a loss how to proceed toward getting this aid and for that reason I am asking your help and council. I hope such a request is not an imposition. You may be sure I shall await upon and closely follow any suggestions as to procedure and any advice you may offer.

Respectfully yours,

sgd - W. Warrick Cardozo, M.D. '24.

Dear Sir:

Upon the suggestion of Dr. Arthur Howe, President of Hampton Institute, I am filing this application for a fellowship.

The application is made in the hope that I might get a chance to do further work in Pediatrics provided I had the funds with which to support myself. At the present time I am seeking the opportunity to study under Dr. Brenneman at the Children's Memorial Hospital of this city and if this can be arranged I plan also taking advanced work in Biochemistry either at the University of Chicago or at Northwestern University. I have not yet had an appointment with Dr. Brenneman but expect one within the next week.

Yours very truly

W. Warrick Cardozo.

Dear Doctor Davis:

I have just received a letter from Dr. J.H.J. Upham, dean of the College of Medicine of Ohio State University, also chairman of our Board of Trustees. He calls my attention to a colored boy who was graduated by Ohio State University in 1933, and who made an excellent record as a student, ranking in the first ten of his class. The boy served a year's internship in the Cleveland City Hospital and is now resident in pediatrics in Provident Hospital, Chicago.

I understand he is trying to secure a fellowship from the Rosenwald Fund and wants to get a year of study under Dr. Joseph Brenemann. Doctor Upham recommends this boy very highly, both as to personality and as to his qualifications. I hope you will be able to help him.

Sincerely yours,

Morris Fishbein

OFFICE OF THE DEAN OF MEN

My dear President Howe:

Re: Dr. Wm. W. Cardoza

I wish to say that I knew the above named young man from his entrance to Hampton, Sept. 1919 to July 1924. After spending a year in the preparatory class, he entered the trade school as a machinist, completing the course in 1924.

He was always an active and independent young fellow, physically strong and mentally alert. In general deportment, he was considered as average, but in mental and physical ability, he was far above the average. His contribution in athletics made him quite an asset in that department. He is ambitious and always desirous of going forward. As I recall, it was his hope to study engineering, after graduating from Hampton. He wanted to enter the University of Pittsburgh, but for some reason, he entered Ohio State University and studied medicine. We kept in touch with him for some time after he left Hampton, and we were much interested in him because of the steady progress which he made. As far as I know, he has maintained a good name and has been a fine representative for Hampton.

I saw him last in St. Louis, where I heard him speak to a group of members of one of the fraternities, and I was much interested in his talk and advice to them. After having been in two other institutions since leaving Hampton, he credited his success to contacts which he had made at Hampton, and seemed to take great pride in having had these connections. I think we can safely say that those of us who knew him in our department have grown to admire him more and more, because of the advancement he has made in the Profession of Medicine.

Respectfully yours,

Walter R. Brown

My dear President Howe:

William Warrick Cardozo participated in class and varsity athletics at Hampton. He was a member of the varsity football team in 1922-23, basketball in 1923, and track in 1923.

He was not a flashy or outstanding star in football but was a consistent gainer from the full back position when he played. In the 1922 football game with Howard University, he was the outstanding player in the back field.

In 1923 Mr. Cardozo was a member of the Mile Relay team. This team made a creditable showing in the meets that year.

As an athlete he was dependable and always tried to do his best in whatever sport in which he took part. His character was of the highest, which made him a great asset to the athletic squads.

Yours very truly,

Dear Dr. Bousfield:

I want to thank you for your letter concerning Cardozo. I am in a little of a quandry since getting it and want to talk to you about it.

He came in to see me the other day and said that he could probably raise some money outside and wanted to have me fix him up some sort of a plan for doing work here, not as an intern but as an outsider. Somehow I don't just instinctively take to the man and I wondered, in the light of what you wrote me, whether you had any information that you might give me about him that would be of value to me in reaching a decision as to what to do with him.

He is coming in again sometime soon and I would very much appreciate it if I might hear from you at an early opportunity.

Very sincerely yours,

Joseph Brennemann

Re: Trip to Knoxville, Tennessee made by
Drs. John W. Chenault and W. W. Cardozo

Dr. M. O. Bousfield
Julius Rosenwald Fund
4901 Ellis Avenue
Chicago, Illinois

December 11, 1935

Dear Dr. Bousfield:

Following your suggestion, I am submitting a report of the trip to Knoxville on November 23rd. The trip was made with Dr. J. W. Chenault.

We left Chicago on November 23rd and arrived in Knoxville that evening. The next day Dr. H. M. Green, our host, presented us at one of the local churches, showed us about the town, and we made a brief visit to the Tuberculosis Sanatorium on the outskirts of the city. On Monday, we visited the Negro Unit of the Knoxville General Hospital and had a brief conference with the superintendent of the institution. He was very kind and courteous. During the afternoon, Dr. Chenault did some orthopedic work for Dr. Green while I visited the Payne Avenue Nursing Home and Welfare Clinic. That evening, we met and spoke before a small group composed of some of the local physicians, ministers, teachers, and business men. On Tuesday morning, we left for Nashville where we visited Hubbard Hospital. We arrived in Chicago on Wednesday, November the 27th.

It is the opinion of Dr. Chenault and me that the Negro Unit of the Knoxville General Hospital has excellent possibilities for the practice of medicine among Negroes in that community. We were surprised that more of the local physicians had not availed themselves of the opportunity to work there, for the management of the hospital seem very kindly disposed and willing to co-operate as far as they were able. Such disposition, however, seems to depend upon the local factions in control of the city. It is difficult to say what the future attitude may be, but at present it is favorable.

The Payne Avenue Nursing Home and Clinic is greatly in need of funds, and the children need better medical care. The home could be a highly potent factor in the general welfare of the children of the community.

My own opinion of the field there is that with hard work, and at least some assistance from the important members of the town, one might build a very worthwhile practice of pediatrics. The well built hospital unit and the sanatorium offer exceptional opportunities. At present, I am very favorably inclined to take up this opportunity when my connections in Chicago terminate.

I cannot conclude without a word of appreciation for the fatherly kindness and interest of Dr. Green and the delightful hospitality of Mrs. Green, our host and hostess.

Mar. 29,
~~1936~~
1936

Dr. Julius H. Hess
104 South Michigan Avenue
Chicago, Illinois

Dear Dr. Hess:

Following your suggestion, I am putting in writing the matter about which we talked at our recent conference.

It is my purpose to be a competent and trained Pediatrician. As far as I am able to ascertain, there is but one Negro with enough training in Pediatrics to be recognized as a specialist by the Examining Board of that particular specialty. He is Dr. Alonzo de G. Smith, now Professor of Pediatrics at Howard University in Washington, D. C. and formerly of New York City. A further survey of Negro physicians would easily reveal that few of them are practicing Pediatrics solely and that there is a marked dearth of competent men to teach the medical students in the colored schools. Before one can teach, or even practice, Pediatrics correctly it is quite evident one should have had sufficient training in the specialty first. What that standard of "sufficient training" is is now being established by the American Board of Pediatrics. Such standards can, therefore, serve as a method of measuring the steps toward my purpose.

I am making application to you for a year of post-graduate training in Pediatrics to begin the next school year. I have intimated that I hope to teach but I have no assurance of such a position. However, it was suggested by Dean Numa P. G. Adams of Howard University that I might be more eligible for such a position if I had this year of training. A degree is not essential. At present, I have a fellowship from the General Education Board thru the University of Chicago. A statement from you that you will accept me for training will undoubtedly be a favorable factor in having my fellowship renewed at the end of this year.

I am a graduate of the College of Arts - 1929 - and the College of Medicine - 1933 - at Ohio State University in Columbus, Ohio. I have had one year of rotating internship at Cleveland City Hospital - Cleveland, Ohio - and one year as resident in Pediatrics at Provident Hospital - Chicago. At the end of that year - July 1935 - I received a fellowship for one year, as stated above, to do a research problem in Sickle Cell Anemia. My research director is Dr. Julian H. Lewis of the Department of Pathology at the University of Chicago.

FRISK
UNIVERSITY

To: Dr. Julius H. Hess

My problem is to investigate the immunological aspects of Sickle Cell Anemia. The work is not yet completed for publication. To date 1,125 persons have been tested for sickling of their red blood cells. Of this group 66 are white. The remainder are Negroes of both sexes varying from 4 days to 84 years. They are found in the out-patient clinic and on the wards of Provident Hospital. Each blood tested was also typed according to the International Code (O,A,B, AB). The washed cells and the inactivated sera of thirteen (13) of our positive sickle cell were tested by cross matching against each other and against similarly treated cells and sera of normal Negroes and whites. Over 200 such tests have been made. We are also attempting to ascertain the distribution of Landsteiner's "M,N and MN" immune agglutinins with regard to positive cases, normal Negroes and whites. Thus far, not many bloods have been tested because the anti-sera is not generally available and must be made from known bloods having the particular property. We have succeeded in producing anti-sera of high titre and we are testing bloods with the sera as rapidly as possible. The entire problem has thus far been conducted alone.

At present, the anti-sera described above is used principally for the so-called medico-legal paternity tests other possible uses are not known, but they might offer some interesting problems in Pediatrics.

This matter of another year of training is of vital importance to me. I believe too that I can adapt myself to any situation that might arise should I be given the opportunity. I sincerely hope, therefore, that you will give my application the kindest consideration.

Yours very respectfully,

W. Warrick Cardozo, M. D.
