

1939

RENEWAL

RUTH M. SMITH (N) 22

Anatomy

Excellent letters from Western Reserve
Very practical scientific study:
the reproductive cycle in Negro
women of low economic group.

Only question is, how long do we
continue such grants for people
still a long way from the
doctorate

If any grant is made it should
not be above the \$1,400 of last
year (as contrasted to the \$1,700
she now asks) maybe \$1,000 would do
that is all Lloyd asks at Illinois
McLean gets her high

Renewal

anatomy

We have already given two awards

She has had a good record
(upper 15-20 per cent of her classes)
but she will have completed
her requirements for Ph. D. this

June. I think we have done
enough for her. We could continue
to support her research
indefinitely. Just because she
has married an insignificant
interne seems to me no reason
for us to continue to support her

No

Candidate Ruth Morris Smith

Special Field Anatomy
(Endocrinology)Student, Howard University
Washington, D. C.

Plan of Work

To study for the Ph. D. under the direction of Professor T. Wingate Todd, at Western Reserve University, concentrating on the problems of the reproductive cycle in woman.

Admitted to Western Reserve. Duration of study two years to begin September, 1938.

Digest of Application

Born January, 1917, Washington, D. C. Single.

A. B. from Mount Holyoke College, 1937. Studying for M. A. at Howard University.

Research: at present working on M. A. thesis; Fertilization Cones in the Eggs of Arbacia

Scholarships: Mount Holyoke College for undergraduate study a total of \$950; Howard University, tuition scholarship, \$150.

Special Field (Embryology)

Candidate (Embryology)

Howard University, Washington, D. C.

Plan of Work

To study for the Ph.D. under the direction of Professor T. Morgan at Howard University concerning the problems of the reproductive system in man.

Admitted to Reserve. Duration of study two years to begin September, 1938.

ERC: young, conservative. Of Hartman says good, do we want to carry over?

Digest of Application

A. B. from Mount Holyoke College, 1937. (Working for H. A. at Howard University.)

Present working on H. A. thesis; fertilization time in the case of man.

Howard University, tuition estimated \$1500. Scholarships: Mount Holyoke College for undergraduate study a total of \$3500.

Mrs: Must consider seriously. A girl with good record. Sent to Carl Hartman of Baltimore, Carnegie Lab of Embryology, Med. Sch. of Johns Hopkins, best authority in this field. Should she work with load?

References: If you want to develop scholars we must be able to give them comparable of white.
