

1939

Head, department of biology, Tuskegee

Soil microbiology

He is good - almost average -  
 but not brilliant or anything  
 approaching the genius type  
 I noted him A- last year  
 simply because Patterson said  
 he was best of all the Tuskegee  
 applicants -

But he's now a year older  
 and nothing to indicate  
 any other change in his status
