My dear Dr. Bousfield:

I have recently been conferring with Dr. ~~William B. Perry, Jr.~~, an extremely promising young negro physician who is here this year and will receive the Master of Public Health degree in June, as to his future. I know of Dr. Smillie's correspondence with you and wonder whether you can give me any date covering your possible need of this man. I am very anxious to get something for him and, amongst other things, have thought he might spend another year here with us. He will require some assistance if he does that and in order to take care of him I must begin to get into action. I am inclined to think that if he could go promptly into field work under your auspices he would be very fortunate and it would be the best way to accomplish his purpose. He is an exceedingly able and intelligent young man. He came here with the highest recommendations from the University of Pennsylvania and he has entirely justified these opinions.

MAR 17 1937

Very sincerely yours,

Cecil K. Drinker
