Oct, 20, 1938,

Dear Dr. Bausfield,

I enjoyed very much having lunch with you in New York several weeks ago. Thanks again for your frank and sincere opinions concerning my work and your consideration of me in the field of Syphilis control work.

Since I last saw you have talked in person with Dr. Haven Emerson of Columbia University and Dr. Hood Dean of school of Preventive medicine, Unfortunately the class in Public Health was filled and I could not enter. I have called Dr. Mustard of New York University and

and was informed that they confined their public health teaching to the under graduates, so I filed application for the post graduate course in Syphilis given by the New York Univ. Medical School as planned by the State Health Dept.

They are not accepting any part time physician so I hardly felt that I could take the course from 9-5 every day for 8 weeks as prescribed.

Therefore I believe I shall continue my studies at Post Graduate School as of last year.

Dr. Walter Clark has been very elusive having ^{made} appointments with me but had to break them because of urgent business meetings, I expect to see him soon.

Hoping to see you on your next trip here and inviting you to dinner in my home - Englewood.

Very truly yours,
A. R. Jenkins, M.D.
