Plan of Work

To make a general survey of the influence of French civilization in the Western Hemisphere, with especial attention to regionalism in French literature as compared to the same phenomenon in American (Southern) literature. This, I think, might well form the basis for my thesis and completion of study for my Ph.D. degree, after which I plan to teach in some southern university or college.

Wishes to attend Harvard University, working under Drs. Louis Cons and F. Baldensperger. Probable duration of study one to two years, beginning fall, 1940. Undecided about returning to present position.

Personal Data Born Chattanooga, Tennessee, April, 1916. Single. Age: 24
