

1939

Instructor in Natural Sciences
Southern University, Louisiana

Natural Sciences

Good but not top record at Talladega
and T.C.

Project - to study adaptation of
science courses to meet the needs
schools of Louisiana certainly definite
and important.

Doubtful if his findings would
greatly influence state (esp. - view
of other cautious statement by
A.C. Lewis)

Columbia seems worst possible
place to work on problems of
Southern rural education
