

1939

JULIUS W. REITZ

30

Associate Professor Agricultural Economics
University of Florida

Agricultural Economics

and educated exclusively in the North
 Born in Kansas, It just
 happens that he is now teaching
 in Florida (my since 1934)
 He makes no promise of
 remaining in the South. He
 will doubtless go to whatever
 university makes him the best
 offer in agr. economics
 Excellent records testimonials but
 I do not think he qualifies
 as a Southerner in our sense
