BROOKLYN, N. Y.

REGARD 25788

11-28-37

Dear Dr Dousfield,

I have really never had my cerebral hemispheres as active as they have been since you arrived in town and plunked down this problem before me. I consulted all the people I spoke to you of and tho they had things of interest to say I was still left dangling. I might have written before but I have been waiting to see Dr West, who was expected back from Washington tonight but had not arrived when I last went by. I regret not seeing him, for I feel he might have been of some

help.

The proposition is most attractive and really furnishes the opportunity for the exact field of work I am interested in. I appreciate that the connections with you and the Rosenwald Fund mean much.

On the other hand are the interferences with my present plans of school and Dept of Health Clinic work but most of all the domestic problem of which I spoke to you. If this proposition were only to come two or three years later! I'm truly sorry I can't see my way clear to accept under the present conditions, and hope that the time may come when we can get together on a program.

Let me thank you for your kindness and consideration and

J. S. PETERSON, M.D.

380 MONROE STREET,

BROOKLYN, N. Y.

DECATUR 2-5798

hope I may have the pleasure of  
seeing you on your next trip  
here. Perhaps you'll have  
time to pay us a short visit  
and have dinner with us. It  
will really be no trouble!

Very sincerely

Sidney Peterson
