

Negro Physicians

August 4, 1939

Dear Doctor Howard: As far as I know, I shall be in New York City during the sessions of the National Medical Association - certainly until Thursday evening and perhaps Friday. I think it would not be worth while to make a visit there for the purpose of discussing a scholarship for further study in surgery. It would be at least a year before any grants can be made in this field unless some very unusual situations occur. In the meantime, it is quite likely that I shall be in Baltimore, and if so I shall try to see you.

Very truly yours,

M. O. BOUSFIELD

M. O. Bousfield, M.D.
